Why flowers and nature matter

Working with flowers encourages us to slow down, notice colour, texture and scent, and enjoy the simple satisfaction of making something by hand.

Pause & reset

A calm, hands-on activity that brings attention gently into the present moment.

Connection

Shared creativity encourages relaxed conversation and meaningful time together.

Confidence

Learning a skill and completing a design creates a genuine sense of achievement.

Calm & enjoyment

Flowers offer a soothing, uplifting and purposeful change of pace.

Flowers awaken the senses and create moments worth sharing.

Created around your group

Choose a public date, arrange a private workshop, or ask for a bespoke session. Groups of five can be welcomed at my home studio; for larger groups I can come to you or help source a suitable venue.
